is the result.*

# SERVICE & DISTRIBUTION

Our highly experienced team offers rapid and continuous technical assistance to all our customers. In addition, we develop with each proposal or need and we solve it by adapting to the productive characteristics of the customer: product and application. This makes us your best supplier with comprehensive management of each project.

# PRODUCTS

We work with different product lines focused on different needs and market developments. These lines are the following: solvent based, water based and powder coatings.

- **Polyester:** for spray or curtain application. Both redox and ultraviolet curing primers and topcoats are available. We also offer spatula primers and roller fillers.
- **Roller:** UV products for flat line, with very low grammage they offer an excellent look and feel.
- **Mouldings:** solvent-free UV products with a guarantee against breakage. We carry out follow-up tests in our laboratory according to the needs of each customer (cold-check).
- **Metalter:** Suitable for direct application on most metal surfaces. It has really special characteristics.
- **Plastter:** Perfect for the application of plastic surfaces. It is very hard, adheres very well and quick dry.

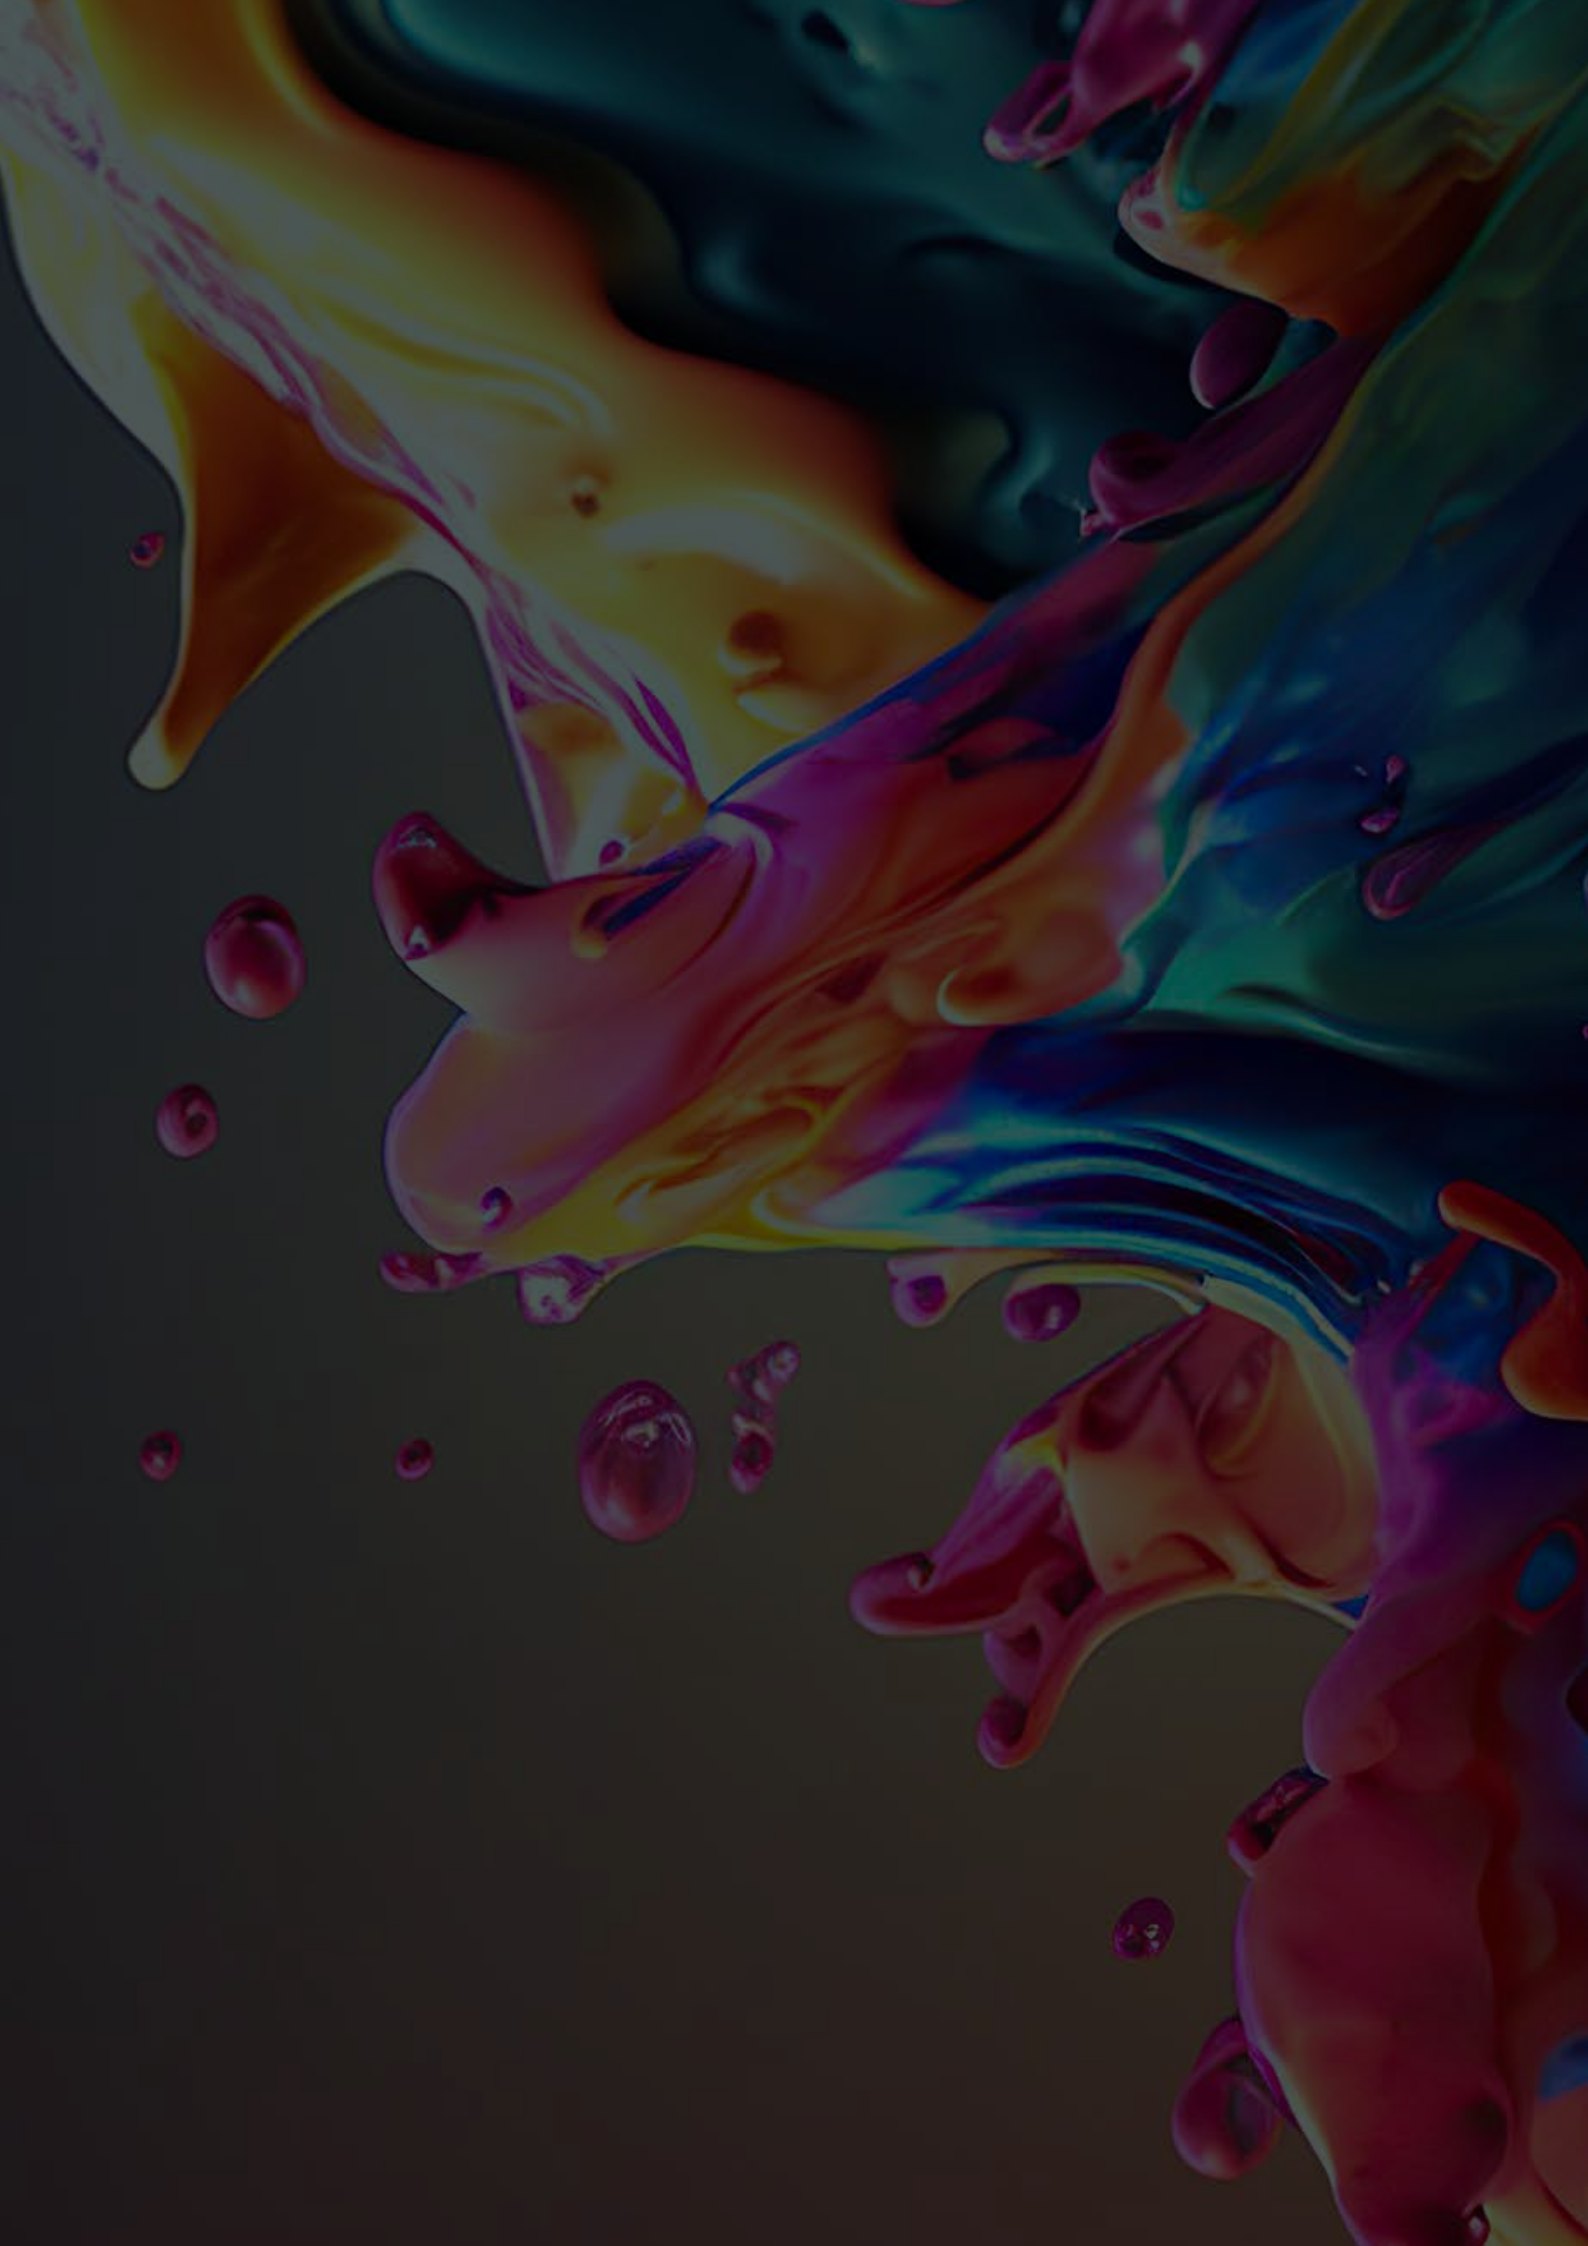

- **Polyurethane:** Direct decorative applications on glass. Excellent resistance to yellowing in clear or pigmented finish.
- **Primers:** Adhesion promoters on melamine, paper, wicker, greasy woods, etc.
- **Pigment pastes:** the pastes of our tintometric system.
- **Concentrated dyes:** universal dyes characterised by their transparency and light fastness.
- **Solvents:** from cleaning products to those specific for each product in each period.
- **Nitrocellulose lacquers:** Irilac series, base coats and one-component finishes.
- **Glazes, patina glazes and blurring agents:** perfect for decorations such as decapé, shading, antiquing, patination, etc...

*A great  
team  
creates great  
products*
